INTRODUCTION

The intent of this publication is to provide a readily accessible means of identifying lakes open to *Tribal Alternative Monitoring of Walleye Harvest in the Wisconsin Portion of the 1837 and 1842 Ceded Territories* applicable to the Voigt Treaty Off-Reservation Conservation Code.

The contents of this publication may be modified on occasion. Please contact the Biological Services Division or the Division of Intergovernmental Affairs of the Great Lakes Indian Fish and Wildlife Commission to confirm the most recent update or see the GLIFWC website at <http://www.glifwc.org>.

TRIBAL ALTERNATIVE MONITORING OF WALLEYE HARVEST ON CERTAIN LAKES IN THE WISCONSIN PORTION OF THE 1837 AND 1842 CEDED TERRITORIES

REGULATIONS

In the areas designated as open for the alternative monitoring of spring tribal walleye harvest on certain lakes within the portion of the ceded territory located in the State of Wisconsin, No member shall harvest walleye in the spring by the method of spearing, without a monitoring team present, on any lake except as listed in this document. In regard to any permit issued, a member must comply with all regulations established in Chapter 9 of the Voigt Treaty Off-Reservation Conservation Code and must also comply with all other terms and conditions of the permit as imposed by the Tribe.

TRIBAL ALTERNATIVE MONITORING OF WALLEYE HARVEST ON CERTAIN LAKES IN THE WISCONSIN PORTION OF THE 1837 AND 1842 CEDED TERRITORIES

No member shall harvest walleye in the spring by the method of spearing, without a monitoring team present, on any lake except as listed in this document in accordance with the following principles:

- (a) The tribes shall recommend that tribal prosecutors charge in such a way so that tribal members caught in violation of this provision receive a minimum of a one year revocation of their treaty reserved harvesting rights upon successful prosecution.
- (b) Any tribe seeking to designate for spring spearing a water body listed in this document shall provide notice to the DNR of the bodies of water listed in the document which tribes have designated for spring spearing that night and of the walleye bag limit for each body of water to be fished in accordance with Sec. 5.00 of the Voigt Intertribal Task Force Protocol on Walleye and Muskellunge Harvest Levels.
- (c) Any tribe seeking to designate for spring spearing a water body listed in this document shall provide notice to the DNR no later than 6:00 p.m. of that same day of those bodies of water listed in the document, if any, for which no spearing permits have been issued by that time in accordance with Sec. 5.01 of the Voigt Intertribal Task Force Protocol on Walleye and Muskellunge Harvest Levels.
- (d) Each tribe may only designate for spring spearing, two (2) water bodies per night that

are listed in this document. However after appropriate data, information and study on the compliance and enforcement of this stipulation, and upon consultation with and approval of the State, the Tribes may incrementally increase the list of water bodies designated per night by each tribe to ten (10) water bodies that are listed in this document.

(e) Any tribe seeking to designate for spring spearing a water body listed in this document shall designate a creel team to be present at a specific location or at the tribal registration station provided:

(i) The specific location shall be determined at the time the permit is issued.

(ii) The creel team shall remain on duty until the alternative monitored permit(s) the creel team is responsible for is turned in and the fish harvested are creeled or notice is provided by the Biological Services Division or Conservation Enforcement Division that the creel team is released for the night.

(f) A tribal member may only be issued for that night, a permit (alternative monitoring permit) for spring spearing walleye harvest on a water body listed in this document before the tribal member is issued another (monitored permit) spring spearing or netting permit(s) for that night. Once a tribal member has been issued a spring spearing or netting permit(s) (monitored permit) that member may not receive for that same night an alternative monitoring permit for spring spearing walleye harvest.

(i) For the purpose of this section “night” shall be defined as the time between one hour after sunset on one day and one hour before sunrise on the following day; and the time of sunset and sunrise shall be ascertained according to the mean solar time of the ninetieth meridian west from Greenwich, commonly know as central time, as given in any almanac.

(g) A tribal member may only possess one (1) permit (alternative monitoring permit) for a water body listed in this document at any one time and the tribal member may not be in the simultaneous possession of any other outstanding spring spearing or netting permit.

LIST OF AREAS DESIGNATED AS OPEN FOR THE ALTERNATIVE MONITORING OF SPRING TRIBAL WALLEYE HARVEST WITHIN THE PORTION OF THE CEDED TERRITORY LOCATED IN THE STATE OF WISCONSIN
