

This Map is to Help You Find Safe Ogaa (Walleye) in Lakes Harvested by Red Cliff

IF YOU ARE PREGNANT OR NURSING, COULD BECOME PREGNANT, OR UNDER THE AGE OF 15, USE THIS MAP.
DO NOT EAT OGAA LARGER THAN 20 INCHES. EAT OGAA LESS THAN 20 INCHES AND CHOOSE EVEN SMALLER OGAA TO FURTHER REDUCE MERCURY EXPOSURE.

Funding for these maps was provided by the Environmental Protection Agency (EPA).

GLIFWC: February 2026

For Ogaa Smaller than 20 Inches:

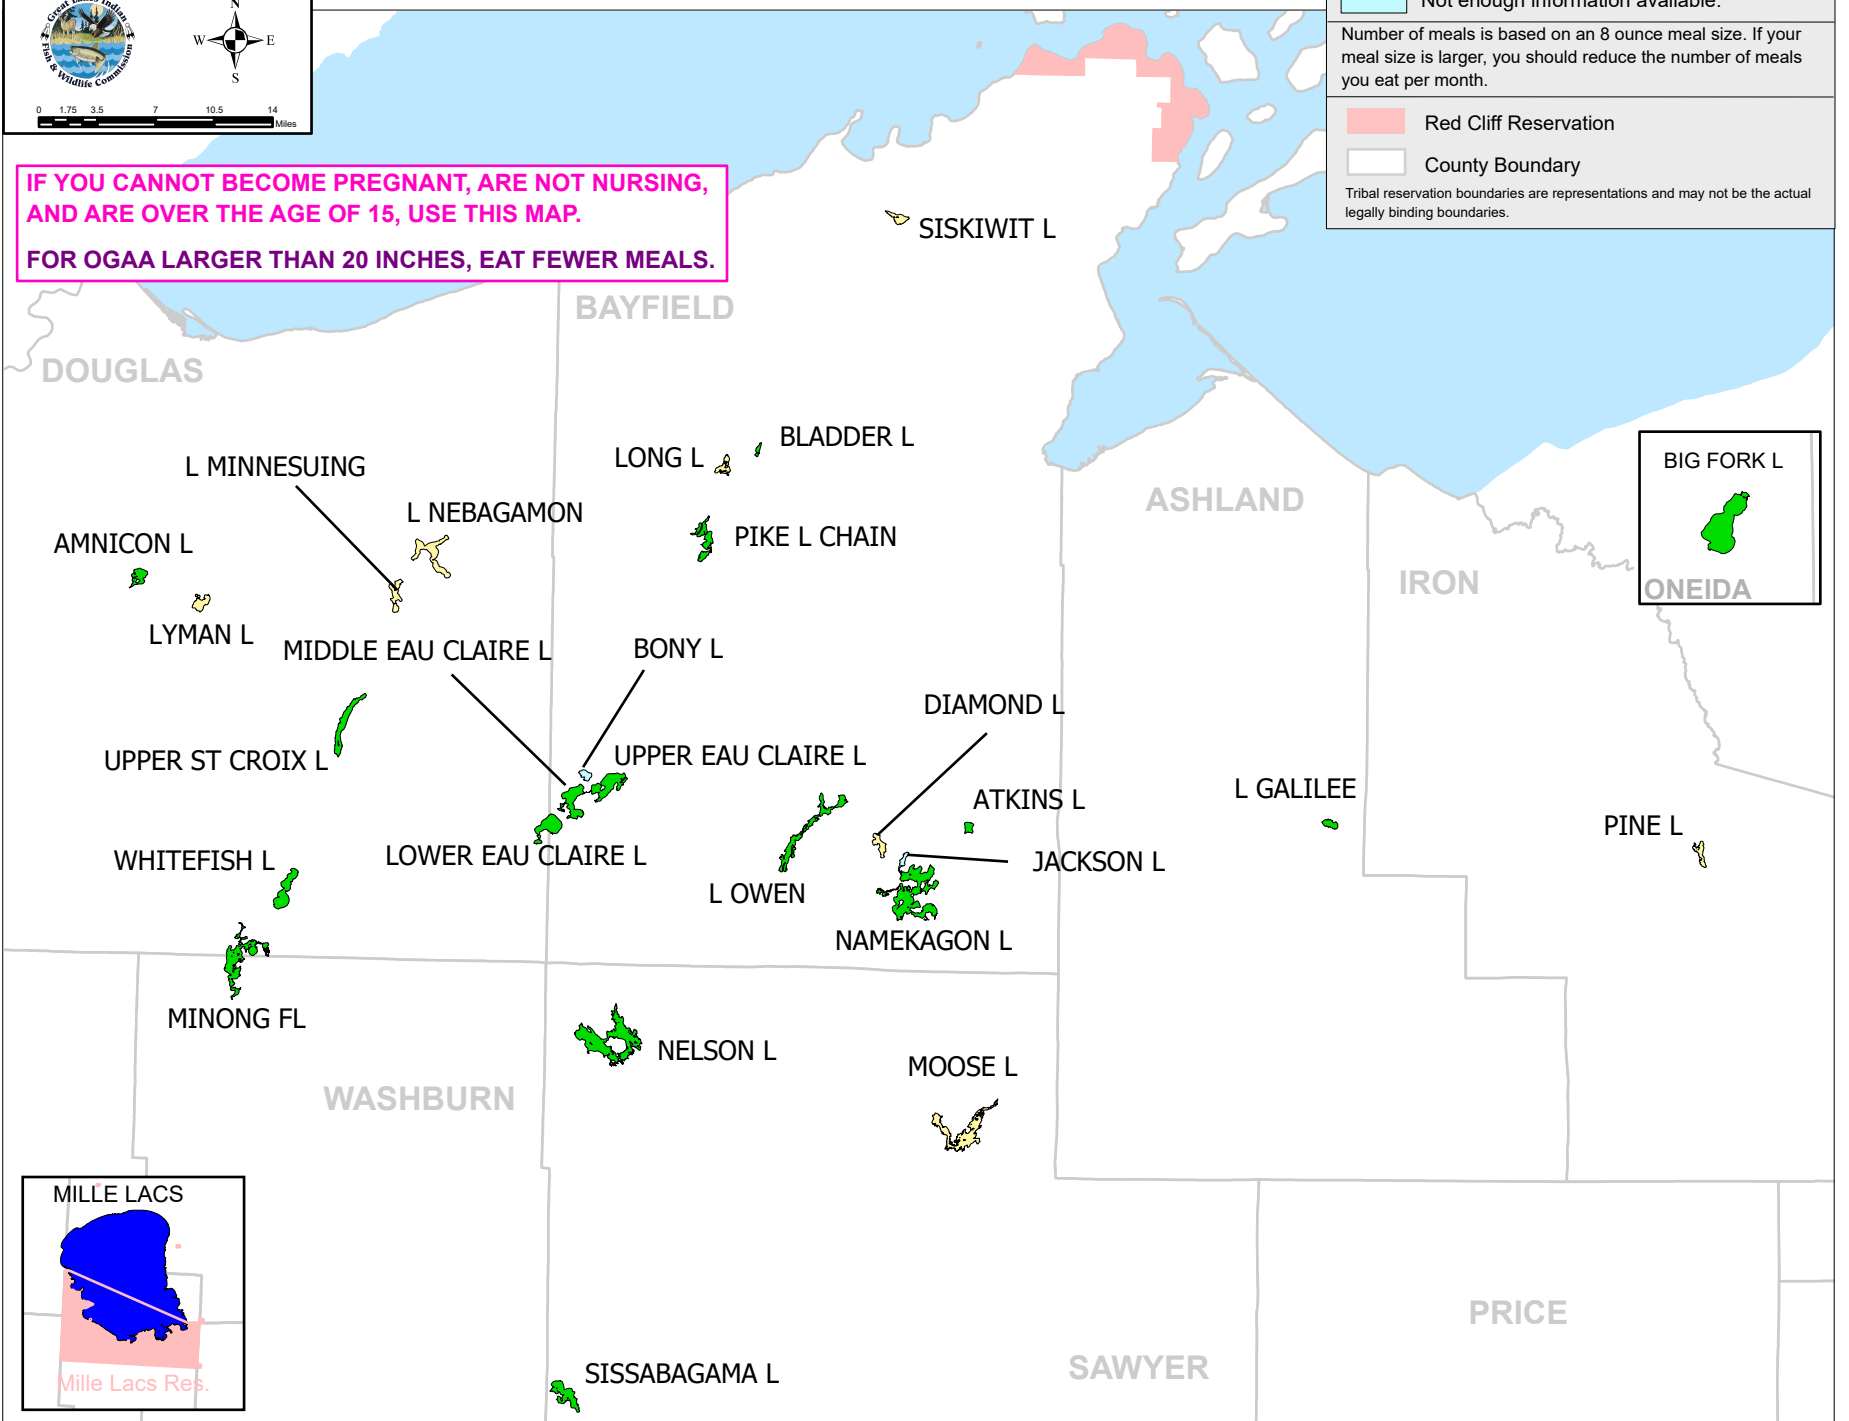

- Eat up to 8 meals or 64 ounces per month.
- Eat up to 4 meals or 32 ounces per month.
- Eat up to 2 meals or 16 ounces per month.
- Eat up to 1 meal or 8 ounces per month.
- Do not eat ogaa from these lakes.
- Not enough information available.

Number of meals is based on an 8 ounce meal size. If your meal size is larger, you should reduce the number of meals you eat per month.

- Red Cliff Reservation
- County Boundary

Tribal reservation boundaries are representations and may not be the actual legally binding boundaries.

IF YOU CANNOT BECOME PREGNANT, ARE NOT NURSING, AND ARE OVER THE AGE OF 15, USE THIS MAP.
FOR OGAA LARGER THAN 20 INCHES, EAT FEWER MEALS.

Recommended Maximum Number of Oгаа Meals per Month for Lakes Harvested by Red Cliff

SORTING AND LABELING *OGAA* PRIOR TO FREEZING

When Cleaning *Oгаа* (walleye):

- Put *ogaa* under 20 inches in bags labeled “under 20 inches.”
- Put *ogaa* over 20 inches in bags labeled “over 20 inches.”
- Label bags with the lake name.
- Follow the advice below for maximum number of meals per month.

USING THIS CHART TO FIND SAFER *GIIGOONH*

MAXIMUM NUMBER OF MEALS PER MONTH

Advice is for all lakes combined. For example, if you eat four meals in a month from green lakes you should not eat any other meals of *ogaa* in that month.

MEAL SIZE

Meal size is based on 8 ounces. An average 19-inch *ogaa* will have 8 ounces of meat. If your meal size is larger, you should eat fewer meals of *ogaa*. If it is smaller, you can eat more meals of *ogaa*.

OTHER *GIIGOONH*

Giigoonh such as muskellunge, largemouth bass, smallmouth bass, and northern pike will have more mercury than *giigoonh* such as lake whitefish, herring, bluegill, sunfish, crappie or perch. Try to choose safer *giigoonh*.

LAKE	COUNTY	SENSITIVE: Anyone who is pregnant or nursing, could become pregnant, and children under 15	GENERAL: Anyone who CANNOT become pregnant, is NOT nursing, and is over 15

For many native people, *giigoonh* are part of a traditional and healthy diet. If you rely on *giigoonh*, choose safer *giigoonh* with lower levels of mercury by following the advice on this map.

RISKS AND BENEFITS

Risk: Mercury can damage the nervous system, especially the brain. Fetuses and babies are the most at risk because their nervous systems are rapidly developing. Children exposed to unsafe levels while in the womb have been found to experience delayed development in walking and talking, even though the mother was not affected. Mercury cannot be removed by trimming or cooking.

Benefit: Eating even as few as two to three meals of *giigoonh* a month may reduce your risk of death due to heart disease.

**If you have questions about finding safer oгаа, call GLIFWC at 1-715-682-6619.
To learn more about mercury in oгаа, visit GLIFWC’s website at www.glifwc.org/Mercury/mercury.html**
